👋 Hello Haseena!

🤖 **GenAI Assistant Bot**

I can answer questions from my knowledge base and describe images!

Commands:

`/ask <your question>` — Ask anything from the knowledge base
`/image` — Send this command then upload an image (or just send a photo)
`/history` — View your last 3 interactions
`/clear` — Clear your conversation history
`/summarize` — Summarize the last response
`/help` — Show this help message

Tips:

• For RAG, I search across Tech FAQs, Company Policies, Recipes, and AI concepts
• For images, I generate a caption + 3 tags
• Results are cached for speed ⚡

❓ Usage: /ask <your question>
Example: /ask What is RAG? 3:32 AM
H
what is ollama 3:32 AM
O
💬 Answer:
Ollama is an open-source tool that enables running large language models locally on your own machine. It supports various models such as LLaMA 3, Mistral, Phi-3, Gemma among others. Good prompt engineering can enhance output quality without model training.

H
what is tea 3:33 AM
O
💬 Answer:
Tea refers to a hot beverage made by steeping dried leaves from the Camellia sinensis plant in boiling water. It can also refer more broadly to any herbal infusion that resembles this preparation, and it's enjoyed worldwide for its flavors and potential health benefits.
